

GLOBAL WARMING & YOU

A Workshop on Youth Climate Activism
February 21, 11:00 AM – 3:00 PM
University of Alberta, ETLC EI-018

This half-day workshop, geared at high school students, will allow you to learn about global warming in a local context, and will equip you with the tools and skills to create your own project that empowers your community to contribute to the global fight against climate change. Be prepared to learn, get creative and make meaningful connections with other people interested in working on these same issues.

Contact Daniella and Christel at globalwarmingandyou@gmail.com for more information or to register.
