

## My Sprout story

(October 2009 –January 2010)

I am a social activist from Myanmar leading a youth-led, non-partisan organization. Regards to Sprout, I have had many memorable things.

The first one is just about I missed the Sprout course done before the course now I am taking. It was due to time miscalculation in chatting with interviewer. 😊😊

But owing to Emily's encouragement, I tried again Sprout fall 2009 course. Then I was fortunate to join the Sprout team as a participant.

Since orientation and the first modules of week 1, I realized "Sprout is unique a lot".

Tools and strategies are designed to meet the needs of us: participants. Having mentor for participants is extremely helpful for participants' learning process.

Regular submission of assessments, Participating in forums and blogs, Providing each a TIG email, Submission of final project which is hosted in TIG web, Occasional webinars, Timely surveys, rubric by mentors.....

I can't find words which can describe how Sprout helped me !!!

Finally, may I say "Sprout, a great innovative team developing capacity of youths worldwide....." ?
