

STATEMENT OF INTRODUCTION/ COMPANY PROFILE

Jocsoft Solutions is a registered ICT software and hardware company, which was founded in 2005 and registered in 2006. Since then, Jocsoft has emerged as one of the most innovative IT consulting firms offering the following services:

- Computer hardware supplies at affordable rates.
- Customized Software design and development
- IT staff training for organizations
- Hands on computer training for individuals
- Hardware and software maintenance.
- Hardware and software consultancy, including professional advice on handling of computer faults.
- Research and development of emerging technologies like E-Billing, E-Learning, SMS Systems and Biometric solutions as per organization needs.
- Electronic Payment solutions

Jocsoft Solutions supplies all kinds of computer hardware and develops all kinds of software using high level programming languages. We, as IT professionals develop innovative state-of-the-art software as per your company's/organization's specifications. This is because we believe that custom made software products offer the best possible solutions to organizations as needs vary from company to company. In order for organizations and institutions to gain a competitive edge, we work very closely with our clients to ensure that the software solutions meet their requirements. This also, translates into efficiencies and a reduction of manual processes.

Over the years, we have developed a number of custom-made software for many organizations including:

Tiba Hospital Management System

Tiba Hospital Management System (THMS) is a system that will keep track of the flow of data and patient records in a working hospital environment and maintain the accounts of the financial departments. The THSM System is designed in easy to use and can be run in a local area network or a wide area Internet environment. THMS has centrally located database servers used to keep the entire operational records. THMS is a modular application with the ability to add different modules and add-ons as requirement by a working hospital environment. All the modules are integrated on a single point of operation and hence the software can be used in single or multi user environment.

Warehouse, Inventory and Point of sale System

Jocsoft Point of Sale (JOCPOS) system is flexible and it offers a wealth of features that can be implemented when you need them with a minimum of configuration and programming. Small business' yield big results; although no matter how big or small your business is, our software does all the hard work and you take all the credit. Our system can suit any business operation such as supermarkets, bookstores, hardware shops, hotels, pharmacy, and restaurants among others

With VAT return reports, Profit and Loss Analysis, Cash flow reports, reorder levels reminders, bulk SMS for marketing, clients SMS queries among other powerful features JOCPOS remains the best Point of Sale and Inventory System for your business.

We as Jocsoft will be happy to integrate some of our client's personal features to meet their needs to keep them current and competent in market.

Pension Scheme Management System

- A facility where monthly pension contribution will be processed.
- The employees' contribution and the sponsor's contribution to be shown separately with totals.
