

PROJECT MANAGEMENT

The failure rate for IT projects is surprisingly high, with many running over time and budget or not completed at all. As part of our project management service, we work closely with your organization and your vendors to plan and manage project timetables and issues to ensure a successful outcome.

IT CONSULTANCY

Systems Assessment and Implementation

The availability of network systems is vital to your business. Our seasoned IT professionals have years of experience in assisting clients similar to you. As part of our value added service, our project management service group will work with you to create, manage and implement a mutually acceptable project plan that meets your specific needs.

Technology Plan Development

Are you having a difficult time getting your arms around the many different issues dealing with your IT needs and the future technology direction of your organization? We know exactly how you feel. At BAYM, our professionals have worked with clients of different sizes to assist with brainstorming, facilitating and creating a Technology Plan. We can do the same for you.

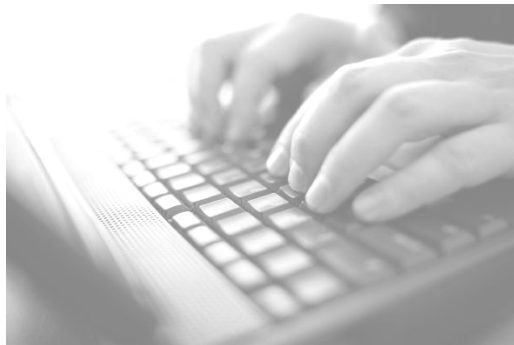

INTERNET

Website Design

"We listen. We visualize. We build." That is BAYM's culture. We believe in the rewards that come from proper project planning and execution, including website design, creation, and management. Creating a web presence is imperative for any business. More important, it is about how to cultivate and leverage the Internet to your best advantage. We can help you.

Web Hosting

If your organizational strategy relies heavily on the Internet, you can not afford any web site downtime. At BAYM, we have relationships and methodologies that can help you to assess and determine the reliability of your existing web host. Those thinking of having a web presence should speak with our seasoned business and technology professionals. We have your answer. We want to share our experience with you.

We can create a Network System that meets your corporate need

IT PROCUREMENT

PC/Workstation/Server Sales

Need a new, state-of-the-art workstation for your mission-critical applications or a Pentium II or Pentium III PC for your daily needs? We provide new and refurbished Personal Computers at a great price. You can obtain a quote from us directly by e-mailing us at mail@baym.org. For immediate attention, call us at (203) 336-9333 and ask for Stephen Fung.

Repair

If your PC isn't working properly, or acting slowly, bring it in and have us take a look. Our experienced technicians will provide you with a thorough analysis of the condition of your PC. Why go somewhere else and spend hundreds of dollars when BAYM can do it for less? We are conveniently located just off I-95 Exit 30 in Bridgeport, serving your everyday PC repair needs.

HUMAN CAPITAL

Staff Coaching / Training

The retention of human capital is vital to any company. Continuous job training is one of the avenues to increase morale and productivity. If you need assistance with staff development or technical training, we have the solution for you. We have years of experience delivering and hosting management development, coaching, and all types of technology training for various organizations and agencies. Call us today. We are eager to help.

WHAT MAKES BAYM DIFFERENT?

We are a non-profit organization. Our non-profit status gives us special insight into the challenges facing our non-profit clients.

We are non-profit specialists. We understand your need for solutions, because we were there ourselves. We work on projects for other non-profits or projects for organizations that fund non-profits. Our expertise is uniquely concentrated in Network and Systems Assessment, and related IT services, including web site design, hosting and project management.

We are experienced. Our seasoned IT professionals have had more than 10 years of experience working in and with non-profit organizations. Our unique project management approach allows us to focus on the critical project milestones. We bring a new perspective to your IT infrastructure projects.

We offer a wide range of services. We will work with you to craft a scope of work that meets your needs, your budget and your deadlines. Our most recent projects include:

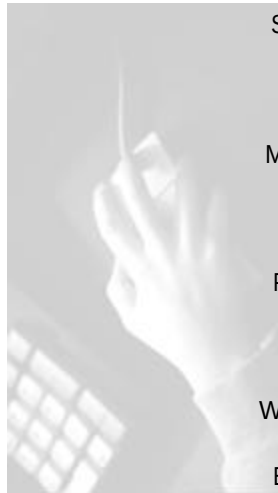

- Creating technology plans for two non-profits in the local area
- Design and implementation of a network infrastructure for a for-profit organization
- Facility rental to conduct a 3-month training program for a local non-profit agency

WE WANT TO HELP, CALL TODAY!
