

**The first Alexandria international model United Nations  
(AIMUN)  
In Bibliotheca Alexandria  
“Re-evaluation of the MENA performance towards the  
achievement of the millennium development goals”**

### **What is AIMUN 2005?**

It is the first model of simulation to the United Nations in Alexandria,  
A model is a student activity that is operated from the very first day by students.  
It is a sincere attempt to think of what is going on around us by our binocular, putting  
ourselves in positions of the world leaders working under the same circumstances in the  
framework of the same organization .i.e. UN facing the same challenges.  
Do you think that our decisions will be the same as theirs?!  
In brief, it is an attempt to have our own vision as youth to the challenges of today  
world.

**AIMUN 2005**, since it is the beginning, we will start by one council (UNDP) which  
will discuss the millennium development goals (MDGS), in the Middle East & North  
Africa region, seeking to find out what is done, and what is needed. In order to ensure  
that the MENA region is on the right track of MDGS' achievement in 2015  
It is expected that we will hold 8 training sessions last for a month from the first of July  
till the first of August .then we will hold a conference in the bibliotheca Alexandria for 4  
days.

### **Participation Advantages:**

This kind of activities is an enormous source of developmental knowledge and skills  
gaining, like for example:

- Presentation skills
- Negotiation skills,
- Communication skills,
- Research skills

This activity is a real tool to break for your self a new ground away from the traditional  
way of learning that we are all accustomed to , especially in the era of globalization that  
have made creativity and knowledge are inevitable .

This activity is an aid to give you the floor to speak out your dreams, suggestions and  
plans for the development of your region.

Lastly, you will be awarded a certificate of merit due to your participation
