Join with positive minded young MCs, amazing spoken word poets, incredible b-boys and girls (break dancing and hip hop) visual artists and activists at Hip Hop Hope 2007! Our goal is to create a positive expression of our lives by recording original tracks on a CD featuring YOU! Our encouraging environment gives all a shot at getting involved. We will build community, have fun and learn to use Hip Hop as an art that can both unify and rock the world!

The Power of Hope unleashes the positive potential of youth through arts-centered intergenerational and multicultural learning programs that value self-awareness, leadership, community and social change.
